Erratum to Montemayor and Eisen

In the article "The Development of Self-Conceptions from Childhood to Adolescence," by Raymond Montemayor and Marvin Eisen (*Developmental Psychology*, 1977, Vol. 13, No. 4, pp. 314-319), the first sentence of the first complete paragraph on page 317 reads:

The mean number of categories used at least once by students at each age was as follows: 8.6, 9.0, 9.1, 9.5, and 11.1; $F(4, 257) = 3.86, ns$.

The sentence should be changed to read:

The mean number of categories used at least once by students at each age was as follows: 8.6, 9.0, 9.1, 9.5, and 11.1; $F(4, 257) = 3.86, p < .01$. The hypothesis that adolescents use more categories for self-categorization than do children was therefore confirmed.
